¹ Use SonarChart™ Live on mobile to automatically share sonar logs with Navionics.
² Latest firmware release is required to run memory cards over 2 GB.
³ Of the Platinum features, Satellite Overlay, Panoramic Photos and Pilot Books are compatible.

Starting from 2013, our products are provided on 2 GB or larger memory cards. Always make sure your GPS chartplotter is compatible. Some GPS chartplotters may be compatible with 2 GB memory cards but may still have difficulty with large file sizes.

¹ Navionics+ Small can be upgraded online to Navionics+ Large. In some cases, it may not be possible to download the full chart coverage at one time.

NAVIONICS ADVANCED FEATURES

Available when using a card that has an active daily chart updates subscription (included for one year if registered within two months of purchase). Also make sure your plotter has an updated software version installed.

Dock-to-dock Autorouting, a unique breakthrough in boating navigation, quickly creates detailed routes from a real start point to a real end point, even through narrow passages and channels, based on chart data and navigation aids.

SonarChart™ Live allows you to create new personal 0.5 m HD bathymetry maps that display in real time on your plotter or mobile device screen while navigating. The new chart resides on your device for private use. Possible methods:

- P** Use your plotter with a sonar to enable SonarChart™ Live and see it directly on the display.
- W** Use **built-in Wi-Fi** to connect your plotter/sonar to Navionics Boating app to enable SonarChart™ Live on your mobile. Depth data collected can also be sent automatically to Navionics to enhance SonarChart™.
- G** Use **GoFree WIFI-1 Module** to connect your plotter/sonar to Navionics Boating app to enable SonarChart™ Live on your mobile. Depth data collected can also be sent automatically to Navionics to enhance SonarChart™.
- S** Use **Sonar Server by Digital Yacht** to connect your plotter/sonar to Navionics Boating app to enable SonarChart™ Live on your mobile. Depth data collected can also be sent automatically to Navionics to enhance SonarChart™.

Advanced Map Options gives customized views of Navionics charts to highlight shallow areas, target a fishing range and adjust SonarChart™ contour density.

Plotter Sync connects plotter and mobile wirelessly and allows you to transfer routes and markers, and update charts on eligible plotter cards. You can also activate or renew a chart subscription (except Navionics+ Small). With Raymarine models, it is also possible to upload sonar logs to enhance SonarChart™.
